A big thank you for your participation!

The EANS 2025 Congress in Vienna has drawn to a close, yet the inspiration, energy, and connections we shared continue to resonate.

Vienna — with its rich medical heritage and tradition of scientific excellence — proved the perfect host for this year's gathering. The VIECON – Vienna Congress & Convention Center welcomed a record 2,430 participants from 90 countries, filling the halls with intellectual energy, collaboration, and the spirit of European neurosurgery at its finest.

Our 61 industry partners went far beyond sponsorship, fostering opportunities for dialogue, innovation, and growth.

This year's scientific programme set new standards and reflected our shared ambition to advance neurosurgery together:

417 lectures

507 oral presentations

339 oral e-poster presentations

726 e-poster presentations

3 keynote speeches

11 plenary sessions

12 masterclasses

74 parallel sessions

18 pre-congress sessions

11 industry symposia

The congress earned a record-breaking 37 EACCME credits

We are deeply grateful to every participant, speaker, and industry partner who made EANS 2025 an unforgettable experience. Your enthusiasm and dedication continue to drive the evolution of our community and the future of neurosurgery.

We hope you enjoyed Vienna as much as we did — and we can't wait to welcome you again at the next EANS Congress in Hamburg!

Save the Date!
